DETAILED ACTION

Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claims 1-4 are rejected under 35 U.S.C. 102(b) as being anticipated by Hoshi.

In regard to claims 1-4, the Hoshi reference discloses an "elongated member" (Fig. 2) having a "first end" 2 and a "second end" 3, a "first color indicia" and a "second color indicia" (see col. 6, lines 1-12), as claimed. Further, the elongated member is capable of indicating whether or not a container needs to be refilled.

Claim Rejections - 35 USC § 103

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

Claims 5 and 6 are rejected under 35 U.S.C. 103(a) as being unpatentable over Hoshi.

The Hoshi reference discloses the invention substantially as claimed (discussed supra) including having a first white color and a second red color, but does not disclose a first color being green. However, it would have been an obvious matter of design

choice to make the elongated member half green and half red, since Examiner takes Official Notice that any combination of colors could be used and it appears that the invention would perform equally well with a multitude of colors.

Allowable Subject Matter

Claim 9 is allowed.

Claims 7 and 8 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

Conclusion

The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. The Dobransky and Hornsby, Jr. pertain to various color coded drinking straws, similar to Applicant's device.
